

PROGRAM SPECIFICS

Reimbursement

Participating schools and institutions receive reimbursement from the USDA for each half-pint of milk served.

In order to receive reimbursement, participants must submit a claim at the end of each month. Milk provided to children who qualify for free milk will be reimbursed at the school's average price per half-pint. Currently, milk provided to children on a paid basis is reimbursed at an average of 13.5 cents per half-pint.

Qualifying Agencies

Public or private nonprofit schools qualify to participate in the Special Milk Program. Schools must not already participate in another School Nutrition Program or have children who do not have access to existing programs (kindergarten and/or preschool children who attend half days).

Want your students to grow and learn? Milk provides essential nutrients for growing bodies. So give your students what they need!

GOT MILK?

“Milk does a child good.”

Milk is one of the cornerstones of a healthful diet. Children who consume healthful foods like milk are bet-

ter able to perform in school and grow to their fullest potential.

If your school is not currently participating in any other School Nutrition program, or if you have kindergarten and/or pre-school children who do not have access to your Lunch or Breakfast Programs, your school is eligible to participate in the SPECIAL MILK PROGRAM. This program provides reimbursement for milk served to children. The goal of this program is to enable schools to provide milk at a reduced price or free to students.

Why Participate?

Why not? The paperwork is simple and will enable your school to provide healthful snacks to your children at little or no cost.

Healthy, well-fed children build healthy habits, are better able to perform in school, and enjoy fewer sick days. One cup of milk provides important nutrients that all children need to grow healthy and strong. They include calcium, vitamins D & A, riboflavin and protein.

How do I get started?

Simply contact the Office of Public Instruction, School Nutrition Programs. Instructions and support will be provided to help you initiate your own Special Milk Program.

GENERAL GUIDELINES

The Special Milk Program must be operated on a nonprofit basis. Federal reimbursement must be used to reduce the selling price of milk to all students.

Any child at a participating school can get milk through this program. Children may buy milk or receive it free, depending on the school's choice of program options.

Program Options

Schools may choose to conduct a **“non-pricing”** program where the price of milk is absorbed by the school. The benefits of this option are that children and schools are not required to submit paperwork for free milk, and children do not have to pay out-of-pocket for their milk. If you choose this option, half pints will **ONLY** be reimbursed at 13.5 cents apiece.

Schools may also choose to use a **“pricing”** program. The benefit of this option is that the school will be reimbursed the full price paid for halfpints provided to qualifying participants. This results in **NO** expenditures on the part of the school to provide milk to these children. If your school chooses this option, children and schools will be required to complete and maintain paperwork to verify eligibility for free milk.

Milk Choices

In order to be reimbursed, your school must serve milk that meets the USDA and Montana standards for the Special Milk Program. You must use fluid, pasteurized milk. Whole milk, low-fat regular or flavored milk, skim regular or flavored milk, and buttermilk are all acceptable options.
